

DIGITAL PUSH

DIGITAL LABS

We say goodbye to this beautiful project by implementing the Digital Labs in the two countries of the consortium. In Ireland, I&F used a focus group style to present the manual and to gain insights from the students involved.

They developed self-assessment questionnaires for both professionals and users to gauge the effectiveness of our manual. These tools helped measure knowledge acquisition, identified learning hurdles, and evaluated content sequencing, adaptability, and design diversity.

In Spain, Forum Educativo successfully implemented the project manual through the Fundación Valentín de Madariaga y Oya. Professionals found the manual valuable, highlighting its versatility and adaptability for individual and group work across various cognitive levels.

TAKEAWAYS FROM THE DIGITAL LABS

The tools are considered to be

- Easy to read
- Versatile
- Adaptable to different educational settings
